R; Vysotskaia, V.S.; Osborne, B.I.; Schwartz, J.:
K.; Feng, J.; Kim, C.; Kurtz, D.; Li, Y.; Palm submitted to the EMBL Data Library, May 1998
A; Description: Arabidopsis thaliana chromosome A; Reference number: Z14214
A; Accession: T00951
A; Status: translated from GB/EMBL/DDBJ
A; Molecule type: DNA
                                                                                                                                            probable 3-oxoacyl-[acyl-carrier-protein] synthase (EC 2.3.1.41) F20D22.1 -
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Date: 12-Feb-1999 #sequence_revision 12-Feb-1999 #text_change 23-Jul-1999

T49095
beta-ketoacyl-CoA synthase like protein - Arabidopsis thaliana
N;Alternate names: protein F4F15.270
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Date: 02-Jun-2000 #sequence_revision 02-Jun-2000 #text_change 02-Jun-2000
C;Accession: T49095
R;Alcaraz, J.P.; Clabault, G.; Cottet, A.; Mache, R.; Mewes, H.W.; Rudd, S.; Lensubmitted to the Protein Sequence Database, April 2000
A;Reference number: Z25015
A;Accession: T49095
A;Status: preliminary
A;Molecule type: DNA
A;Residues: 1-451 <ALC>
A;Cross-references: EMBL:AL049711; GSPDB:GN00061; ATSP:F4F15.270
A;Experimental source: cultivar Columbia; BAC clone F4F15
C;Genetics:
A;Gene ATSP:F4F15.270
A;Map position: 3
A;Introns: 103/3; 298/3
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    70 VLVLVFSAEVGSLSREEIWKKLWDYDLATVIGFFGVFVLTACVYFMSRPRSVYLIDFACY 129

Email: mseki@rtc.riken.go.jp An Arabidopsis full-length cDNA library was constructed essentially as reported previously (Seki et al., 1998). This clone is in a AV781377 RAFL2 Arabidopsis thaliana cDNA clone RAFL02-03-L07 3', mRNA sequence. AV781377 thale cress. AV781377.1 GI:19800167 and Shinozaki,K.

An Arabldopsis full-length cDNA library was constructed essentially as reported previously (Sski et al., 1998).cDNA cleaved with BamHI and XhoI was ligated to modified Lambda FLC-1 vector (Carninci et al., submitted for publication) digested with BamHI and SalI. This clone is in a modified pBluescript vector. Please visit our web site (http://www.gsc.riken.go.jp/e/plant/index_e.html) for further details.

An Arabidopsis full-length cDNA library was constructed essentially
as reported previously (Seki et al., 1998). cDNA cleaved with BamHI
and XhoI was ligated to modified Lambda FLC-1 vector (Carninci et
al., submitted for publication) digested with BamHI and SalI. This
clone is in a modified pBluescribt vector. Please visit our web
site (http://www.gsc.riken.go.jp/e/plant/index_e.html) for further
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 RIKEN Genomic Sciences Center
